Mr. William Jackson
Literacy in the Community
1122 East Pike Street, Suite 1413
Seattle, Washington 98122-3934

Dear Mr. Jackson:

I am pleased to support and recommend the OASES of Literacy Project. The OASES of Literacy Project demonstrates an innovative understanding of issues affecting education and the Latino community. Providing supplemental tools in schools, at community centers, in health centers and in churches will allow Latinos students, those whose first language is not English, consistent access to research based tools regardless their length of stay in any community.

The OASES concept, with its technically advanced supplemental tools, supports language acquisition, reading and reading comprehension. I am impressed with your research that demonstrate the OASES of Literacy Project's proven track record in increasing reading and reading comprehension scores in other state studies.

I hope the Project will achieve results for families in Washington state similar to those experienced in other states.

Sincerely,

Ricardo Sanchez, Chair
Baord of Directors
Latino/a Educational Achievement Project
